AZ-104: Azure Administrator Associate

APPLICATION LETTER

To,
The Leadership Hiring Team
Enterprise Engineering Selection Committee

SUBJECT: Application for Enterprise Technical Architect / Engineering Lead Roles

Dear Hiring Team,

I am writing to express my strategic interest in senior technology leadership opportunities within your organization, specifically roles operating at the intersection of **Enterprise System Architecture, Cloud Engineering, and Engineering Governance**. Backed by over **14 years** of core engineering experience across premium global IT enterprises (including my current architectural tenure at Persistent Systems Private Ltd.) and high-growth SaaS environments, I specialize in designing and scaling resilient, multi-tenant software platforms.

Crucially, I have validated my production design capabilities by achieving dual premium credentials: **Microsoft Certified: Azure Solutions Architect Expert (AZ-305)** and **Azure Administrator Associate (AZ-104)**. This deep architectural grounding enables me to translate complex executive roadmaps into concrete, high-availability infrastructure deployments, driving down structural cloud spend while preserving absolute system integrity.

Throughout my career, I have consistently championed product engineering and modernization initiatives across highly regulated domains, notably the **Banking, Financial Services (BFSI), and high-velocity SaaS** verticals:

- **Enterprise Technical Governance:** Currently formulating application boundaries, microservices patterns, and robust technical blueprints at Persistent Systems.
- **High-Concurrency BFSI Infrastructure:** Architected and optimized critical backend transaction pipelines for the State Bank of India (SBI) and low-latency message routing loops for ICICI Bank.
- **Cloud-Scale SaaS Orchestration:** Spearheaded foundational backend micro-modules and high-stakes integration networks (PayU, IRIS e-Invoicing, Zoho CRM) for CaptainBiz, adapting system throughput to scale seamlessly alongside aggressive multi-tenant business volumes.

As a technical team leader, my methodology balances engineering rigor with commercial velocity. I place heavy emphasis on eliminating technical debt, establishing repeatable continuous integration/continuous deployment (CI/CD) tracks, and mentoring cross-functional engineering squads to achieve sustainable, high-velocity output.

Given my active parameters, I can step into your ecosystem smoothly as an **Immediate Joiner within an accelerated 15-day window**. I look forward to discussing how my technical background and architectural oversight can accelerate your near-term engineering roadmap.

Sincerely,
Rakesh Vishwakarma

EXECUTIVE PROFILE

Highly accomplished **Senior Technical Architect and Engineering Leader** with **14+ years** of progressive experience spearheading the design, cloud migration, and optimization of enterprise-scale, high-concurrency web ecosystems across the SaaS and BFSI sectors. Documented expertise in pioneering multi-tenant microservices architectures using .NET Core, ASP.NET Core, and Cloud Platforms (Azure / AWS). Proven champion in managing cross-functional technical squads, orchestrating complex third-party fintech integrations, and tuning mission-critical database engines for high-availability systems.

✔️ **Azure Solutions Architect Expert | ✔️ Azure Administrator Associate**

TECHNICAL EXPERTISE MATRIX

Cloud & DevOps	Microsoft Azure (CI/CD Pipelines, Azure Functions, Service Bus, Redis, Key Vault, App Services, App Insights, Blob Storage, Azure DevOps, Identity Architecture), AWS (EC2).
Backend Eng.	.NET Core, ASP.NET Core, Web API Core, Entity Framework (EF) Core, C#, MVC 5, LINQ, WCF, ADO.NET, RESTful Microservices.
Frontend Arch.	React JS, Angular, AngularJS, Knockout JS, TypeScript, JavaScript, HTML5/CSS3, Bootstrap, Kendo UI.
Data Engineering	MS SQL Server (2008–2022) — Advanced Performance Tuning, Always On High Availability (AOF), Query Optimization, SQL Profiler; MongoDB, MySQL.
Integrations	PayU Payment Gateways, IRIS e-Invoicing Compliance APIs, Zoho CRM Pipelines, Mixpanel Behavioral Analytics, Git, SVN, TFS.

PROFESSIONAL LEADERSHIP HISTORY

Architect — Persistent Systems
Oct 2025 – Present

Enterprise Cloud Architecture, Microservice Governance, Scalable Solutions Design

- Formulate cloud and application architectures, guaranteeing high availability, structural fault tolerance, and modern multi-tenant platform scale.
- Model and deploy resilient API system boundaries leveraging enterprise-grade .NET Core microservices and native Azure cloud topographies.
- Serve as principal technical advisor across distributed engineering teams, dictating blueprints and unblocking complex structural limitations.

Technical Lead / Consultant — Logo Infosoft
Aug 2023 – Jul 2025

Full-Scale SaaS Engineering, Third-Party Fintech Integrations, Agile Squad Leadership

- Architected foundational high-throughput backend micro-modules for CaptainBiz, a premier cloud SaaS application automating real-time e-invoicing and inventory loops.
- Led end-to-end integration of high-security external financial and enterprise APIs: PayU Gateway, IRIS e-Invoicing, Zoho CRM, and Mixpanel Analytics.
- Partnered with UI/UX engineering leads to deliver robust presentation layers utilizing advanced CSS frameworks aligned directly with Figma design systems.

Rakesh Vishwakarma

AZURE SOLUTIONS ARCHITECT EXPERT

CORE STANDARDS

- Distributed Caching
- Cloud Risk Governance
- Domain-Driven Design
- Agile Squad Mentoring

Technical Lead / Senior Engineer — LTIMindtree
Apr 2021 – Jun 2023

Legacy Re-engineering, Compliance Platforms, Offshore Technical Governance

- Directed structural re-engineering and agile feature roadmap for CRA Wig, a high-stakes enterprise compliance platform built for global conglomerate Wolters Kluwer (WK).
- Conducted granular requirement translation and engineered automated infrastructure deployment grids to guarantee predictable delivery cycles.
- Provided comprehensive technical governance and architectural mentoring to offshore delivery cohorts, establishing strict software engineering benchmarks.

Offshore Associate Consultant / Lead — Capgemini
May 2018 – Jan 2021

Distributed Team Coordination, Ingestion Pipelines, Cloud Storage Architectures

- Anchored an agile offshore engineering division managing the Title Process Automation infrastructure for Insurance Auto Auctions (IAA, USA).
- Formulated precise Technical Approach strategies and Software Requirement Specifications (SRS) based on high-level corporate product management requirements.
- Designed heavy data ingestion and processing workflows utilizing Azure Blob Storage to securely manage automated imaging and high-volume sensitive document tracking.

Senior Software Engineer — Miles Software
Mar 2017 – May 2018

Secure Core Banking Portals, High-Availability Systems, Disaster Recovery

- Engineered and scaled the secure web portal architecture utilized across the State Bank of India (SBI) Client Portal ecosystem.
- Programmed core banking transaction pipelines ensuring ironclad security protocols and sub-second real-time balance and ledger query executions.
- Spearheaded production operations, including routine Disaster Recovery (DR) hot-swap simulations and advanced database index tuning.

Software Engineer — 3i Infotech / GreySoft Solutions
Sep 2012 – Feb 2017

Transaction Monitoring, Messaging Gateways, System Documentation

- Co-developed and optimized high-throughput transaction monitoring frameworks and customized SMS Gateway routing networks deployed extensively by ICICI Bank.
- Authored definitive technical documentation structures including Business Requirement Documents (BRD) and SRS frameworks.

ACADEMIC PROFILE

Degree / Professional Qualification	Sponsoring Institute / Board	Graduation	Performance
GNIIT (Advanced Software Engineering)	NIIT Technologies	2012	74%
T.Y. B.Com (Bachelor of Commerce)	C.H.M. College, Mumbai University	2011	72%
